Lesson 7: Colours and Textures

7.1 Introduction

This section will exam changing the colours of the text and background of the web pages,and the use of textured wallpapers.

7.2 Background Color

BGCOLOR is used to change the color of the background window. The BGCOLOR attribute uses hexadecimal or name of the color. The following example contains the hexadecimal numbers and there corresponding color names.

Example Colours
Black = "#000000"
Lime = "#00FF00"
Green = = "#008000"
Olive = "#808000"
Yellow = "#FFFF00"
Navy = "#000080"
Blue = "#0000FF"
Teal = "#008080"
Aqua = "#00FFFF
Silver = "#C0C0C0"
Grey = "#808080"
White = "#FFFFFF"
Maroon = "#800000"
Red = "#FF0000"
Purple = "#800080"
Fuchsia = "#FF00FF

Example Format;

```
<HTML>
    <HEAD>
      <!--Example of changing background colour-->
    </HEAD>
    <BODY BGCOLOR=”#800080”>
      This web page has a purple background!
    </BODY>
</HTML>
```

7.3 Text and Hyperlink Colours

Once the background color has been changed it may be necessary to change the text color. The <BODY> element supports the following attributes;

7.3.1 TEXT this is used to control the colour of all the normal text in the document which defaults to black.

7.3.2 LINK, VLINK and ALINK enable you to control the colouring of a hypertext link. VLINK stands for visited link and ALINK for active link, the default colours for these are blue, purple and red.

```
<HTML>
        <HEAD>
           <!--Example of Text colours-->
         </HEAD>
         <BODY BGCOLOR=”#FFFF00”TEXT=”#FF0000”LINK=”#00FF00”>
            This web page has a yellow background and red text!
        <AHREF=”trainer/foo.bar”>This link doesn’t go anywhere!</A>
         </BODY>
    </HTML>
```

7.4 Background Wallpaper

In as much as you can put wallpaper in MS Windows, so can you put a wallpaper in your web page. The <BODY> element has BACKGROUND attribute which is used to define the background image to be used on the page. The BACKGROUND attribute should be set to point to the URL (location) of the image to be used as the wallpaper.

Example

```
<HTML>
        <HEAD>
           <!--Example of Text colours-->
         </HEAD>
         <BODY BACKGROUND=”trainer/backlogo.gif”>
            This web page has a wallpaper background.
         </BODY>
    </HTML>
```

7.5 Exercises

7.5.1 Write a note on colour combinations and designing colours using the three primary colours.

7.5.2 What is the use of the text attribute in the <BODY> tag?

7.5.3 Design a document describing you. Assign a suitable background wallpaper, background colour and a text colour.
